

# WOMAN'S GENTLE NATURE CALLS FOR GENTLE TREATMENT

Delicately formed and gently reared, women will find, in all the seasons of their lives, as maidens, wives or mothers, that the one simple, wholesome remedy which acts gently and pleasantly and naturally, and which may be used with truly beneficial effects, under any conditions, when the system needs a laxative, is—Syrup of Figs and Elixir of Senna. It is well known to be a simple combination of the laxative and carminative principles of plants with pleasant aromatic liquids, which are agreeable and refreshing to the taste and acceptable to the system when its gentle cleansing is desired.

Only those who buy the genuine Syrup of Figs and Elixir of Senna can hope to get its beneficial effects, and as a guarantee of the excellence of the remedy, the full name of the company—California Fig Syrup Co.—is printed on the front of every package, and without it any preparation offered as Syrup of Figs and Elixir of Senna is fraudulent and should be declined. To those who know the quality of this excellent laxative, the offer of any substitute, when Syrup of Figs and Elixir of Senna is called for, is always resented by a transfer of patronage to some first-class drug establishment, where they do not recommend, nor sell false brands, nor imitation remedies. The genuine article may be bought of all reliable druggists everywhere; one size only. Regular price 50 cents per bottle. Get a bottle today to have in the house when needed.

## FASHION HINTS

A novelty chiffon Marquise of rose color is used here as an overdress for a lingerie gown. It's a fine way to rejuvenate a last year's creation; and one overdress, being entirely complete in itself, may work its magic on several gowns.

## CANADA FORGING AHEAD.

Thomas C. Shattwell, one of the greatest market reporters in America, writes from New York, under date of March 20th, and says:

"The tariff tangle with Canada which President Taft has taken in hand is of importance chiefly because of the multitude of American farmers that are crossing into the Canadian northwest. Most conservative estimates of their number place it at 150,000 for 1910. Some say as many as 250,000 will cross. These are all expert farmers and their places in the United States are being filled by untrained men from Europe and from the cities. Canada is gaining rapidly in agricultural importance and within a few years the United States will have to call on the Dominion for wheat. Production of wheat in the United States is not keeping pace with the population. A tariff war would complicate the problem of getting food. Even now Canadian farmers are getting higher prices for their cattle on the hoof, and Canadian housewives are paying less for meat in the butcher shops than farmers and housewives are receiving and paying in the United States. The tariff on cattle and wheat must be removed as between the two countries before long."

**A Girl Got Miners.**  
Ida, 17-year-old daughter of a Civil War Veteran, G. W. Rumble, 1144 Edwy St., San Francisco, goes into the mountains with her papa's locating device and method and locates gold mines; also re-locates lost pay chutes in old mines. Write her, and she will tell you about it.

**DR. MARTEL'S FEMALE PILLS.**  
Seventeen Years the Standard.  
Prescribed and recommended for women's ailments—a scientifically prepared remedy of proven worth. The result from its use is quick and permanent. For sale at all drug stores.  
Mrs. Winslow's Suffering Syrup for children teething; soothes the gums, reduces inflammation, allays pain, cures wind colic. 25 cents a bottle.

## A Clean Man

Outside cleanliness is less than half the battle. A man may scrub himself a dozen times a day, and still be unclean. Good health means cleanliness not only outside, but inside. It means a clean stomach, clean bowels, clean blood, a clean liver, and new, clean, healthy tissues. The man who is clean in this way will look it, and act it. He will work with energy and think clear, clear, healthy thoughts.

He will never be troubled with liver, lung, stomach or blood disorders. Dyspepsia and indigestion originate in unclean stomachs. Blood diseases are found where there is unclean blood. Consumption and bronchitis mean unclean lungs.

## Dr. Pierce's Golden Medical Discovery

prevents these diseases. It makes a man's insides clean and healthy. It cleans the digestive organs, makes pure, clean blood, and clean, healthy flesh.

## Awful Burning Itch Cured in a Day.

"In the middle of the night of March 20th I woke up with a burning itch in my two hands and I felt as if I could pull them apart. In the morning the itching had gone to my chest and during that day it spread all over my body. I was red and raw from the top of my head to the soles of my feet and I was in continual agony from the itching. I could neither lie down nor sit up. I happened to see about Cuticura Remedies and I thought I would give them a trial. I took a good bath with the Cuticura Soap and used the Cuticura Ointment. I put it on from my head down to my feet and then went to bed. On the first of April I felt like a new man. The itching was almost gone. I continued with the Cuticura Soap and Cuticura Ointment and during that day the itching completely left me. Frank Gridley, 325 East 43rd Street, New York City, Apr. 27, 1909." Cuticura Remedies are sold throughout the world; Potter Drug & Chem. Corp., Sole Props., Boston, Mass.

**Conquered It.**  
"Colonel, don't you think, as the result of your observation during many years of public life, that the holding of a government position tends to take away a man's independence and make him merely a machine?" asked the inquisitive acquaintance.  
"Indubitably," said the internal revenue collector. "There was a time, for instance, when, if you had asked me such a question as that, I should have kicked you out of my office, but I have become used to such things now and don't mind them at all."

**Have You a Baby?**  
Every woman knows how imperative it is that her baby's things should be absolutely and perfectly clean. She knows the trouble she has with common yellow soaps that leave the dirt in and often make the little garments harsh and irritating to baby's skin. Easy Task soap—you can get it of your grocer—is the quickest and safest cleanser made; it is antiseptic—and it reduces the work of washing by half.

**She Was Frank.**  
Miss Mary Morris, daughter of the late William Morris, poet and craftsman, said at a dinner in New York: "I like the American taste for its frankness. Better be frank, even if wrong. The pretty American girl was by no means hopeless whose comment on first seeing the incomparable glory of the Venus de Medici was, 'I wouldn't be seen dead with ankles like that!'"

**RHEUMATISM IS CURABLE.**  
NATURE'S REMEDY (No tablets) will cure Rheumatism and do it quickly. It so thoroughly cleanses the system that the kidneys never again become clogged. It cures even almost inveterate Rheumatism. Take one tonight, you'll feel better in the morning. Get a 50c Box. All Drug Stores. The A. H. Lewis Medicine Co., St. Louis, Mo.

**Ordering Society.**  
A friend from Denmark who declares he knows tells me that the late King and Queen of Denmark put down their uncolored and even extraordinary youthfulness of appearance and character to the fact that they never had anybody about their court who was over 40 years of age. Any gentleman or lady over that age was superannuated.—The Gentlewoman.

Ladies who take pills in clear, white clothes should use Russ Bleaching Balm. Sold by grocers.

**Objection Sustained.**  
Judge—The witness told all that happened on the second floor. Now, why do you object to his telling what happened on the third floor?  
Counsel—Because if it please your honor, that is another story.—Brooklyn Eagle.

**The Various "Rocks."**  
A breeder of Bull Rocks wants some one to explain why it is claimed that Barred Plymouth Rocks are so much better market fowls than all other varieties, especially the Buffs and White Plymouth Rocks. All three have the same general conformity, all three have yellow legs and yellow skins, and the buff and whites have no black pin feathers, as have the barred variety.—Exchange.

**A Good Forage Crop.**  
Canada peas and oats is a favorite forage crop with many New York state farmers. The crop may be sown from early spring to the middle of May. By making sowings at intervals of two weeks, a succession of crops may be

# FARMER'S CORNER

## Planting Potatoes.

The prevailing, and we might say foolish, custom of most farmers is to plant potatoes just as they come, little and big. Indeed, some use the smaller ones for seed and retain the larger ones for cooking purposes, sometimes placing them on the market.

While such a course will not noticeably affect the potato crop for a single season, its continuation surely but slowly lowers the yield—not so much by an insufficient number of tubers, but by inferiority in size and quality. We believe this to be the chief blunder made by most potato raisers and that it accounts for more failures with this crop than any other one cause.

Assuming that you failed to select seed potatoes at the proper time last season (as nine out of ten fail to), great care should be exercised in selecting seed this spring. With the thought in mind that it was quite likely the healthy, vigorous plant which produced the larger tubers, these should be chosen for seed, since the smaller potatoes, which no doubt came from a weak or inferior plant, and, if planted, would produce a like growth. Is this not true of any other plant or animal life? Then why should it not be true of potatoes?—Twenty-first Century Farmer.

**Facts About Farms.**  
Nearly 1,000,000 new farms have been created in the United States during the last ten years. In the last ten years the total number of farms has increased 18 per cent. In the older States, from Ohio eastward, there has been going on for 20 years a tendency toward the amalgamation of farms distant from market into larger holdings.

## HOW TO PLANT SHRUBS, ROSES AND TREES.

Correct way of making hole. No tie how the bottom is rounded. The roots lie with a downward turn. They are not cramped or crowded or bent from their proper course.

On the other hand, this section has witnessed the cutting up into smaller sizes of many farms nearer to market. There are now almost three times as many farms as in 1870, and an unprecedented increase in the value of farm lands and live stock.—American Agriculturist.

## Tree Planting Device.

To those who will be planting shade and fruit trees the following method may be of assistance. In preparing for planting stake out the plot having the stakes in the line in several directions. After the plot is carefully staked the trouble is to get the tree set on the exact place occupied by the stake. The following plan will overcome this difficulty. Take a board about 8 ft. long and 8 inches diameter, as shown in illustration. Bore a hole

## DRIVE FOR TREE PLANTING.

In each end cut a notch in the middle. Place the board with the notch against the stake and drive wooden or iron pins into the holes B, B. The board can then be removed from the pegs, place the tree in the notch and pack the soil around the roots. The tree will thus be in the exact spot occupied by the stake, and in line with the others.

## Egg Imports.

The fact that eggs are not included in any lists of imports which have been published and from the results of the American hen's activities, as reported by the census office, leads to the supposition that importing eggs would be like carrying coal to Newcastle. In 1900 over 1,250,000,433 dozen eggs were produced in the United States. This number is large enough to provide each person in the country with seventeen dozen eggs a year. There are almost four times as many chickens in the United States as there are people.

**The Egg-Eating Hen.**  
Some one wants to know how to keep hens from eating their eggs. Having had some experience along that line, I offer a few suggestions: A deep nest box, in which there is only room for the hen's body, so that she cannot get at the eggs when on the nest, and too deep for her to reach the eggs when standing on the edge of it, is a good thing. The best nest box I have used is 14 inches square and 18 inches deep, covered with a 6-inch door or opening at the top of one side.

**Red clover in bloom is not good for hogs, but when young it makes a fine pasture.**  
Do not fill the churn over one-third to one-half full. Give the cream room for agitation.  
The worn wire fence makes hog pasturing easy compared with the old-fashioned rail fence.  
Good butter must be properly presented to the market. It must not only be good, but look good.  
The type of sheep that combines a large body with a good fleece is the one for the small flock owner.  
Keep the pigeons' flying, joists clear of bolts as the birds are apt to injure themselves by flying against them.

had. The common rate of sowing is one and one-half bushels of each per acre. The peas are usually scattered broadcast on disked or harrowed ground, and then turned under about three or four inches deep. The ground is then harrowed and the oats drilled a few days later. The land may first be prepared and each crop drilled separately, but this is not usually as satisfactory as the other method. Peas and oats are good for hay or to cut and feed green. When the oats are heading and the peas blossoming one may begin to cut for green feed. For hay the oats should be in the milk stage, and the peas should have well-formed pods. Peas and oats can also be pastured to advantage with hogs. This crop will give a yield of five to seven tons per acre of green weight.

## Temporary Sheep Fence.

A movable fence of this kind for soiling sheep is made in panels as seen in the picture. The panels are

ten feet long, made of four-inch boards solidly nailed together. After this fence is once put up sheep or hogs are not likely to overturn it. A fence three and one-half feet high will turn most stock.—Denver Post.

## Value of the Silo.

The Missouri Experiment Station summarizes the value of the silo as follows: Silage keeps young stock thrifty and growing all winter. It produces fat beef more cheaply than does dry feed. It enables cows to produce milk and butter more economically. It is more conveniently handled than dry fodder. The silo prevents waste of cornstalks in the manure when silage is fed. The silo will make palatable food of stuff that would not otherwise be eaten. It enables the farmer to preserve food.

## Chocolate Almonds.

Shell and blanch the almonds by pouring boiling water over them, then slipping off the skins. Lay on a towel until dry. Melt in a double boiler a cake of sweet chocolate and dip each almond quickly in this, rolling it over and over, and then lay on waxed paper to dry.

## Bean Soup.

Cook small soup beans (which have been soaked over night) in the water in which the ham was boiled. About twenty minutes before serving add a couple of potatoes cut fine. No seasoning will be required. Serve very hot.

## Looks Well and Tastes Well.

A round loaf-shaped sponge cake with the center scooped out and filled with diced pineapple and mixed with whipped cream and seasoned with sugar makes a slightly and tasty dessert. Decorate the top with cherries.

## Oatmeal Soup.

Slice one large onion into one teaspoonful of melted butter. Add one cup of cooked oatmeal. Cook five minutes. Add two small cups of milk, one cup of stock and season. Strain, boil up and serve hot.

## Nut and Cheese Sandwiches.

Chop very fine (or grind) two dozen English walnut meats. Whig half a cup of cream very stiff, add a little salt and add the minced or ground nuts and spread between slices of graham bread.

## olive and Cheese Sandwiches.

Chop a dozen stoned olives very fine. Rub a Philadelphia cream cheese to a paste with the minced olives and spread between crustless slices of bread cut thin.

## Hints About the House.

Slice bananas over the cereal and serve with milk or cream.  
A cloth wrung out of vinegar and wrung round cheese will keep it from molding.  
Stuffed potatoes are made by mixing cheese and bread crumbs in with the contents.  
Ammonia water that has been used for washing may be used for plants. It is an excellent fertilizer.

## Shed shoes that have become shiny and worn looking can be freshened by rubbing them with fine sandpaper.

## A coarse cloth dipped in salt and water and rubbed over straw matting will prevent it from turning yellow.

## Pour a little melted butter on top of cereals and cover with stewed prunes, figs, canned peaches or raspberries.

## Boil pots and pans in water and washing soda. Scour enameled ware with one part of fine salt to two parts of fine sand.

## A few allspice are an improvement to steaks, thick soups and gravy. They give almost the same flavor as if wine had been added.

## Plaster figures in hard or alabaster finish are easily cleaned by dipping a stiff toothbrush in gasoline and scrubbing into all the crevices.

## Garments that are to be hung out to air can be put on hangers rather than pinned to the line. This prevents sagging or marking with the clothespins.

## After the weekly washing rub a little vinegar and spirits of camphor over the hands. This will keep the hands in good condition summer and winter.

## To remove ink stains from colored wash goods cover spots with lard, rub well, then wash in usual manner. While this method is simple, it is sure, and will not injure the most delicate colors.

## When beating the whites of eggs for any purpose the busy housewife will find it a saving of time and the eggs will be stiffer and newer in every way, if a pinch of salt is added before the beating begins.

# THE HOUSEHOLD

## The Kitchen Entrance.

The kitchen entrance of a house should be as attractive as the front entrance. A back porch with maps, brooms, buckets and scrubbing outfit scattered about is inexcusable. A large box, painted any desired color, could be used as a closet for them. Plant boxes placed along the porch edge and filled with flowers will add beauty. Vines over a door, where there is no porch, will prove bright and cheerful.

## Salted Dressing.

One tablespoonful of flour, one tablespoonful of dry mustard, one tablespoonful of sugar, one-half teaspoonful of salt, one-half cup of sweet milk, one-half cup of vinegar, three-quarters cup of water, a lump of butter the size of a walnut. Mix flour, mustard, sugar and salt with a little of the water until smooth, then add the other ingredients and stir over the fire until thick.

## Mock Mince Pie.

Roll out four crackers and stir into them one and one-half cups of sugar, one cup of molasses, one cup of cider, one cup of water, two-thirds of a cup of butter, melted, one cup of chopped raisins, spices to taste, and, last of all, two well-beaten eggs. Bake in a pie plate lined with good pastry and cover with an upper crust.

## Hollandaise Sauce.

Cook together two tablespoonfuls each of butter and flour and pour on them a cup of heated milk. Beat to a smooth sauce. Take from the fire and beat in gradually the whipped yolk of an egg, a tablespoonful of salad oil, pepper, salt and sugar, a pinch of each, and the juice of half a lemon. Serve at once.

## Bean Biscuits Again.

Two cups of cleaned wheat bran, one cup of white flour, one teaspoonful of baking soda, one teaspoonful of salt. Mix thoroughly and add one-half cup of molasses and one and one-half cups of sweet milk. Bake in gem tins in a slow oven for thirty minutes.

## Chocolate Almonds.

Shell and blanch the almonds by pouring boiling water over them, then slipping off the skins. Lay on a towel until dry. Melt in a double boiler a cake of sweet chocolate and dip each almond quickly in this, rolling it over and over, and then lay on waxed paper to dry.

## Bean Soup.

Cook small soup beans (which have been soaked over night) in the water in which the ham was boiled. About twenty minutes before serving add a couple of potatoes cut fine. No seasoning will be required. Serve very hot.
